FORAX

Digital Forensic Examination Report

EXAMINATION REPORT

2026-04-16 12:00
Report No: FORAX-RPT-20260416-3201

Case ID	**FORAX-20260415121848**	**FIR / Ref No.**	N/A
Lead Examiner	Ali12	**Badge / ID**	INV-001
Department	Digital Forensics Unit	**Laboratory**	Headquarters
Jurisdiction	As per authorizing instrument	**Crime Type**	Under Investigation
Device Info	Standard Forensic Extraction	**Warrant Ref**	N/A
Classification	CONFIDENTIAL	**Requesting Agency**	N/A
Report Integrity	DFA4A68B09311EEAD5AD122F0C22611D7B27014BC3ADC262B5B33D799FE6B52F		

1 — Legal Preamble & Authority

NOTICE: This document constitutes a formal Digital Forensic Examination Report prepared in accordance with the Federal Rules of Evidence (FRE 901, 902, 1006), the Daubert Standard for expert testimony, ISO/IEC 27037:2012 (Guidelines for identification, collection, acquisition and preservation of digital evidence), and NIST Special Publication 800-86 (Guide to Integrating Forensic Techniques into Incident Response). This report is intended for use in legal proceedings and administrative inquiries. Unauthorized disclosure, copying, or distribution is prohibited.

Authorization: Examination conducted under authority of **Departmental authorization**, issued by **As per authorizing instrument**, at the request of **Digital Forensics Unit**. All procedures have been conducted in compliance with applicable laws, regulations, and departmental standard operating procedures (SOPs).

2 — Examiner Qualifications

Name	**Ali12**	**Badge / ID**	INV-001
Department	Digital Forensics Unit	**Role**	Lead Forensic Examiner
Qualifications	Per departmental training records		

3 — Examination Methodology

Tools & Environment: FORAX Forensic Intelligence Platform v2.0. Analysis engine: AI-assisted classification (CNN image analysis, NLP text scoring). Hash algorithm: SHA-256. Operating environment: Isolated forensic workstation. All tools have been validated per laboratory quality assurance procedures.
Standards Followed: ISO/IEC 27037:2012, ISO/IEC 27042:2015, NIST SP 800-86, SWGDE Best Practices.

Process Summary: (1) Evidence was received and intake documented in the chain of custody log. (2) Forensic acquisition was performed creating a bit-stream image; SHA-256 hashes computed at acquisition time. (3) Automated AI-assisted analysis was performed classifying each artifact by risk level. (4) Results were reviewed by the lead examiner. (5) This report was generated with a cryptographic manifest seal to ensure integrity.

4 — Executive Summary & Analytics

FORAX Examination Summary. Total extracted artifacts: **8**. Filtered view: **5** artifacts. **5 HIGH RISK** items flagged for review.

CRITICAL ALERT: 5 HIGH RISK item(s) identified. Immediate review by supervising officer recommended per departmental SOP.

5 — Chain of Custody & Integrity Verification

Cryptographic Verification: All digital evidence sealed with SHA-256 at time of acquisition. Combined manifest hash:
`DFA4A68B09311EEAD5AD122F0C22611D7B27014BC3ADC262B5B33D799FE6B52F`
Integrity Status: All hashes were computed at acquisition. Any subsequent modification will produce a different hash, invalidating the chain of custody for the affected item(s).

2026-04-15 12:18	**Case Initialization:** FORAX-20260415121848 formally assigned to Ali12. Evidence intake documented.
2026-04-15 12:23	**Evidence Acquisition:** Forensic acquisition initiated. Device connected via secure forensic gateway.
2026-04-15 13:03	**Data Extraction:** Bit-stream image capture of 8 blocks completed. SHA-256 hashes computed per artifact.
2026-04-15 13:33	**AI-Assisted Analysis:** Automated classification engine completed processing. 5 item(s) flagged as HIGH risk.
2026-04-16 12:00	**Report Finalization:** Examiner review completed. Cryptographic seal applied. Format: Full Extract

6 — Detailed Evidence Manifest (Exhibit Register)

Each evidence item is assigned a unique Exhibit Number for court reference. SHA-256 cryptographic hashes are provided for integrity verification per FRE 901(b)(9).

Exhibit	Filename / Path	Device	Risk	Size	Examiner Findings / AI Analysis	SHA-256 Hash
EX-001	download.jpg	LocalSystem	HIGH	8.9KB	[LOCAL CNN] Weapon/firearm detected (class=weapons, conf=53%) | DRUGS: 0.1% | NORMAL: 0.2% | NSFW: 3.1% | SCAM: 0.5% | VIOLENCE: 43.6% | WEAPONS: 52.6% ***FORAX Forensic Reasoning:*** *CRITICAL FINDING: The local CNN identifying patterns matching 'WEAPONS' with 53% confidence. 7 — Behavioral Intelligence Profile

HIGH

Composite Score: 65/100

0	Communication
5	Media Files
0	GPS Locations
0	Downloads
0	Recovered

Threat Category Breakdown

Violence & Threats — CRITICAL (5 file(s), score: 100)
Weapons & Firearms — HIGH (5 file(s), score: 67)
Narcotics & Drugs — HIGH (5 file(s), score: 56)
NSFW Content — HIGH (5 file(s), score: 56)
Scam & Phishing — LOW (1 file(s), score: 11)

Examiner Assessment

Behavioral analysis of 5 extracted artifacts reveals a HIGH overall risk classification (score: 65/100). 5 item(s) were flagged as HIGH risk, representing 100.0% of all evidence. Primary threat categories identified: Violence & Threats (CRITICAL), Weapons & Firearms (HIGH), Narcotics & Drugs (HIGH).

Media Analysis

Metric	Value
Images	5
Videos	0
Audio Files	0
High Risk Media	5

8 — Examiner Findings & Conclusions

Based on the forensic examination of 8 digital artifacts extracted under Case FORAX-20260415121848, the automated analysis engine classified 5 item(s) as HIGH risk, 0 item(s) as MEDIUM risk, and 0 item(s) as LOW risk (cleared). Primary threat categories identified include: Violence & Threats, Weapons & Firearms, Narcotics & Drugs. These findings warrant further investigative action. All findings are documented in the Exhibit Register (Section 6) and the Behavioral Intelligence Profile (Section 7). The integrity of all evidence has been preserved through SHA-256 cryptographic hashing at the time of acquisition.

9 — Certification & Declaration

Examiner Certification

I, **Ali12**, Badge/ID **INV-001**, hereby certify that:

1. I conducted the forensic examination described in this report in accordance with accepted forensic methodologies, ISO/IEC 27037:2012, and departmental standard operating procedures.

2. The evidence described herein was handled in a manner consistent with maintaining its integrity and the chain of custody has been preserved throughout the examination process.

3. All SHA-256 cryptographic hashes were computed at the time of acquisition and have been verified prior to the generation of this report.

4. The findings, opinions, and conclusions expressed in this report are based upon my training, education, experience, and the evidence examined.

5. This report is a true and accurate representation of my findings. I have not knowingly omitted or misrepresented any material facts.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief.
